Wireless around the Schneider-PLC

Move wirelessly around the Schneider-PLC and communicate for example ONLINE in the status

You shortly need a logging of your PLC's operating states respectively are on the way of figuring out a problem and have no datalogger? No problem, connect the PC, start the PG-2000-software with "option datalogger", define relevant variables, appoint timestamp and then the recording starts running immediately. The data will be stored on the fixed disc according to the configuration.

Remote-maintenance Siemens-S7-PLC with MPI/Profibus over VPN-server

Remote-maintenance of a Siemens-S7-controller with S7-LAN on MPI/Profibus over separate VPN-server
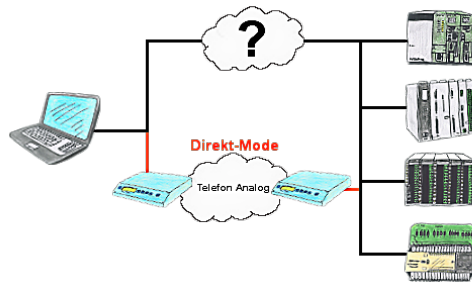

Recognize cable breakage, contact problems and line faults.
Retransmissions and failures are logged and reported.
Early acting before total failure of the participant.

Do you also need the energy-consumption of your plant or need to determine the cos phi?
With the EtherSens Energy you can capture and record by using a Rogowski-coil or
folding-core the required values.

Direct-mode „extended serial interface"

There is an unsupported control or data logger or converter integrated in your installation which protocol is not supported? No problem, the signs that the PC in the office sends will be transferred via telephone line by the Direct-mode , and on-site reproduced by the TP/TB. The way back is identical. So in that case there's also a communication to the electronic devices available.

Wireless around the Pilz-PLC

Move wirelessly around the Pilz-PLC and communicate for example ONLINE in the status
