Logged data to Excel

Capture the required values, whether if energy-data, states of inputs or outputs, process values such as oxygen-content in the environment,... and write this with a timestamp in a CSV-file. This file can then be read and processed with Excel.
S5-PLC triggered DB-backup/-restore without additional PC via PG-socket and Ethernet on SD-card

Remote-maintenance of a Pilz-controller with network-connection via secure VPN-tunnel and scalable firewall
Transmission of fault messages as a voice message to several participants
 MESSI NG 3G can send stored-voice-messages to specific recipients depending on the defined input and signal status. To do this, the specified phone-numbers are called according to the phone-number-plan and then the digitized voice-message is transmitted.
 Depending on whether the message has been acknowledged or not, the next participant in the numbering-plan will be informed.
 Let yourself for example, giving water-levels over the phone, MESSI NG 3G will do this for you.

Failure report transmission released by the PLC

Your outstation reports the current value cyclically, or in case of malfunction the status via FAX, as SMS to your mobile phone, to your pager or also via e-mail.
On site at your system, in the middle of the field and no 24V supply for your e.g.
S7-LAN-module?
Plug the USB power cable into a free USB-socket on the PC, connect the cable to e.g. the
S7-LAN-module and you have supplied the module with 24V and are immediately online
on the connected bus system.
The adapter generates the required 24V DC from the 5V of the USB-interface. When
using one USB-port, a maximum of 2.5W is available.

Longer distances for L1-Bus

You need for your L1-Bus higher distance like the possible 1200m? You have strong
distrubance on your L1-Bus? You need a serial line for higher distances and this galvanic
decoupled? No problem, all this points are solved through the LWL-adapter. They are
available for artificial and optical fibre, for L1-Bus and RS232.
