Wireless around the Beckhoff-PLC

Move wirelessly around the Beckhoff-PLC and communicate for example ONLINE in the status

Sending ASCII-data to a PC

Your car park or control sends the configuration/capacity utilisation to a PC with a modem, so that the data can be used for further processing.

Detect and alarm Profinet burglary

Recognize cable breakage, contact problems and line faults.
Retransmissions and failures are logged and reported.
Early acting before total failure of the participant.

Interface-switch for PD/PC

You have to work with more PLC-devices, but no pleasure to switch on/off? No problem, you connect a device of the AG-Switch-family to the PLC-devices and your PD/PC and you will be able to communicate to both PLCs. The selection which PLC you make for AG-Switch-I via toggle switch and for the AG-Switch-II via 24V-controll input.

PLC-coupling (data exchange between PLC-devices)

Your pumping stations report the water levels of the central control via telephone network. The central office itself can of course transmit commands/messages to the substations as well. Thereto no dedicated line is required, it's sufficient when the stations connect via network (DSL-router).

Complete supply from the PC

Serial communication with CP and more S5-assemblies

You have a PC with programming software and a 9pin COM-port as interface? No problem, for this purpose the PG-UNI-cable is exactly the right product. Connect it to a Siemens assembly such as H1-CP (CP1430), WF470 and PC or CP-525 with the CP525-adapter and PC and you're Online.
